*Office Memorandum* • UNITED STATES GOVERNMENT

TO : Chief, Intelligence School

FROM : Chief, Intelligence Production Faculty

DATE: 16 November 1960

SUBJECT: Weekly Activities Report No. 41  
10 - 19 November 1960

I. SIGNIFICANT ITEMS

Nothing to report.

II. OTHER ACTIVITIES

25X1A9a

1. Mrs. [REDACTED] section of the Intermediate Writing Workshop ended on 15 November, with a make-up session for the class missed on 3 November. This class section showed an unusual amount of interest in individual consultation with the instructor throughout the course, and a number of the students visited the instructor's office outside of class hours for consultation on particular writing problems.

25X1A9a

2. Mr. [REDACTED] gave a lecture on Photographic Intelligence to the Special Security Officer's Orientation Course. An exhibit of aerial photography and stereo vision was set up in an adjoining room for the course participants. They showed considerable interest and asked many questions.

3. Intelligence Production No. 3 commenced on 14 November with an enrollment of six JOTs.

25X1A9a

4. There has been a shortage of classroom space this week; therefore, classes are being held in the IPF "ballroom" -- Room 2034 -- and Mr. [REDACTED] is conducting his Advanced Writing Workshop (DDS Special) in his office -- Room 2013. Mr. [REDACTED] is holding class every day this week in order to complete the course this week; the course was scheduled to meet on Tuesday and Thursday of next week, but the Thanksgiving holiday would have made it necessary to hold an additional class meeting. The students agreed it would be more convenient to attend class every day this week.

5. Mr. [REDACTED] of PIC conferred with Mr. [REDACTED] of [REDACTED] in regard to the Student Exchange Program with the Soviet Union. It was learned that the United States was able to provide only 22 students out of a commitment of 34 for the exchange program this year. The question was raised as to the lack of U.S. students in the physical and biological sciences participating in the program, whereas the Soviet exchange students are primarily in these fields. Mr. [REDACTED] is particularly interested in having students selected to do research in photogrammetry, optics, film chemistry, and the like. In addition to these, Mr. [REDACTED] is also interested in having students selected to do research in geography, mapping, geodesy, and gravimetry.
